

Name \_\_\_\_\_ Class \_\_\_\_\_ Date \_\_\_\_\_

### Match each of the following terms to its definition:

Saturated fats

Peristalsis

Ureter

Pancreas

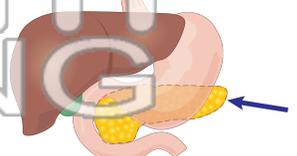

Alveoli

Platelets

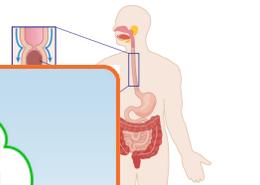

Ventricles

Water-soluble vitamins

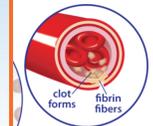

1. \_\_\_\_\_ - the organ behind the stomach that releases digestive enzymes into the intestines for chemical digestion of foods; also releases hormones into the bloodstream to help regulate carbohydrate levels

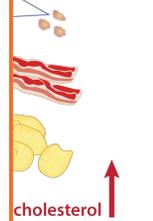

2. \_\_\_\_\_ - waves of smooth muscle contraction that keep food and fecal material in the digestive tract moving in one direction

3. \_\_\_\_\_ play an important role in blood clotting

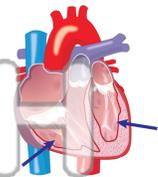

4. \_\_\_\_\_ leads to atherosclerosis

5. \_\_\_\_\_ bladder tube

6. \_\_\_\_\_ - large chambers of the heart that contract to pump blood to the lungs (right ventricle) and out through the aorta to the rest of the body (left ventricle)

7. \_\_\_\_\_ - a class of vitamins that includes C and B complex

8. \_\_\_\_\_ - tiny air spaces within the lungs where gases (oxygen and carbon dioxide) are exchanged between the air space and blood capillaries that surround these spaces

Name \_\_\_\_\_ Class \_\_\_\_\_ Date \_\_\_\_\_

**Match each of the following terms to its definition:**

Saturated fats

Peristalsis

Ureter

Pancreas

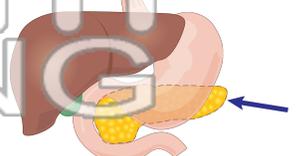

Alveoli

Platelets

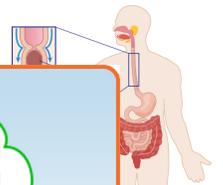

Ventricles

Water-soluble vitamins

1. **pancreas** - the organ behind the stomach that releases digestive enzymes into the intestines for chemical digestion of foods; also releases hormones into the bloodstream to help regulate carbohydrate levels

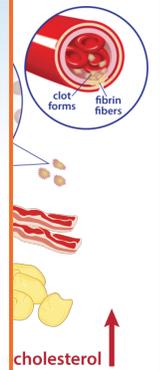

2. **peristalsis** - waves of smooth muscle contraction that keep food and fecal material in the digestive tract moving in one direction

3. **platelets** - an important part of blood that helps with clotting

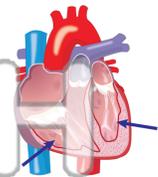

4. **saturated fats** - leads to atherosclerosis

5. **ureters** - to transport urine from the kidneys to the bladder
