7 \_\_\_\_\_  
A someone drinking water  
B water freezing  
C water boiling  
D water being poured into a glass

- A change color
- B evaporate
- C become colder
- D get bigger

9 What does **vaporize** mean?  
A to change from a gas to a liquid  
B to change from a liquid to a gas  
C to change from a solid to a liquid  
D to change from a liquid to a solid

10 What is an example of one kind of matter **changing** into a **very different kind of matter**?

- A when a pencil rolls off a table
- B when firewood burns into ashes
- C when water fills up a sink
- D when an ice cube melts

## ANSWER KEY

What is an example of a **solid** changing into a **liquid**?

- A someone drinking water
- B water being boiled
- C water being frozen
- D an ice cube melting

(d)

What is an example of a **solid** mixed with a **liquid**?

- A a glass of lemonade with ice cubes in it
- B lemonade mixed with soda
- C lemonade mixed with steam
- D boiling lemonade

(a)

Some \_\_\_\_\_ when **added to a liquid** will **break up** into tiny pieces so small that you can no longer see them. An example of this is when a powder mix is added to water to make iced tea.

- A solids
- B liquids
- C gases

(a)

\_\_\_\_\_ means to break a **solid placed in a liquid into tiny pieces** so small so that you **cannot see** the pieces anymore.

- A Dissolve
- B Shake
- C Stir

(a)
