

Name _____ Class _____ Date _____

1 _____ **cover** most of the Earth's surface.

- A Ponds
- B Rivers
- C Lakes
- D Oceans

2 Oceans have **saltwater**. Rivers and lakes have _____.

- A saltwater
- B cold water
- C freshwater
- D sweet water

3 The **movement and recycling of the Earth's water** is called the _____. Water moves from the Earth to the air back to the Earth again.

- A water cycle
- B water phases

4 **Rainwater** is _____ because it has **no salt**.

- A saltwater
- B cold water
- C freshwater

7 _____
A condensation
B change
C evaporation
D melting

- A precipitation
- B condensation
- C evaporation
- D the water cycle

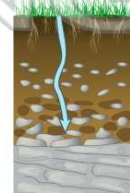

9 _____ is the water that falls back to Earth as precipitation, and **runs off** of hills and mountains into lakes, rivers, and oceans.

- A Groundwater
- B Rain
- C Water runoff
- D Precipitation

10 Some water ends up on land and **soaks into the ground**. This water is called _____.

- A the water cycle
- B rain
- C water runoff
- D groundwater

ANSWER KEY

_____ **cover** most of the Earth's surface.

- A** Ponds
- B** Rivers
- C** Lakes
- D** Oceans

(d)

Oceans have **saltwater**. Rivers and lakes have _____.

- A** saltwater
- B** cold water
- C** freshwater
- D** sweet water

(c)

The **movement and recycling of the Earth's water** is called the _____. Water moves from the Earth to the air back to the Earth again.

- A** water cycle
- B** water phases
- C** water pathway

(a)

Rainwater is _____ because it has **no salt**.

- A** saltwater
- B** cold water
- C** freshwater
- D** sweet water

(c)
