

Name _____ Class _____ Date _____

1 What is the changing of a **liquid into a gas**?

- A evaporation
- B condensation
- C precipitation
- D freezing

2 **Evaporation** occurs when the sun **warms** the water in a body of water and some of the water changes into _____, which **rises** off the water and goes **into the air**.

- A heat
- B water vapor
- C rain
- D snow

3 Which is an example of **evaporation**?

- A ice cube melting
- B lake freezing
- C puddle drying up on a hot day
- D rain falling

4 What aids in the evaporation process and is the **process** by which **plants give off water vapor** into the air through their leaves?

- A evaporation
- B transpiration

7 _____ are made up of **saltwater**.

- A Water runoff
- B Hail
- C Groundwater
- D Rainfall

- B saltwater
- C groundwater
- D precipitation

9 _____ are made up of **saltwater**.

- A Rivers
- B Streams
- C Lakes
- D Oceans

10 How much of the **water** on earth is **saltwater**?

- A 1%
- B 50%
- C 97%
- D 3%

ANSWER KEY

What is the changing of a **liquid into a gas**?

- A evaporation
- B condensation
- C precipitation
- D freezing

(a)

Evaporation occurs when the sun **warms the water** in a body of water and some of the water changes into _____, which **rises off the water** and goes **into the air**.

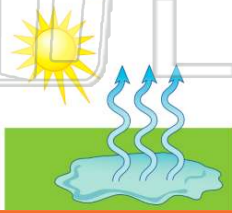

- A heat
- B water vapor
- C rain
- D snow

(b)

Which is an example of **evaporation**?

- A ice cube melting
- B lake freezing
- C puddle drying up on a hot day
- D rain falling from clouds

(c)

What aids in the evaporation process and is the **process** by which **plants give off water vapor** into the air through their leaves?

- A evaporation
- B transpiration
- C evaporation

(b)
