

Name \_\_\_\_\_ Class \_\_\_\_\_ Date \_\_\_\_\_

1 **Echinoderms** live on the **ocean floor** and can **only** be found in what type of water?

- A saltwater
- B freshwater
- C puddles
- D boiling

2 **Arthropods** are the largest animal phylum. What are **two characteristics** of arthropods?

- A have three main body parts and no legs
- B have segmented bodies and jointed legs
- C only have four legs and two sets of wings
- D have two main body parts and wings

3 Spiders are **insects**. **True or false?**

- A true
- B false

4 **Arachnids** include scorpions and \_\_\_\_\_. They have an **exoskeleton** and **four pairs** of jointed legs.

- A insects
- B spiders
- C reptiles

7 Both a crab and a lobster are arthropods. What do they have in common?

- A both have six eyes
- B both have an external shell
- C both have a soft outer body
- D both have six legs

8 Butterflies and bees are both insects. What do they have in common?

- A one main body part and six jointed legs
- B four main body parts and four jointed legs
- C three main body parts and six jointed legs
- D four main body parts and six jointed legs

9 **Coral reefs** are a mass or ridge of **living** coral. They need sunshine and warm waters to survive. **Where** do coral reefs live?

- A in warm, shallow sea waters
- B in deep, cold waters
- C on dry land
- D in rivers

10 \_\_\_\_\_ provide a **protective place to live** for a large variety of **marine** life.

- A Trees
- B Coral reefs
- C Puddles
- D Clouds

## ANSWER KEY

**Echinoderms** live on the **ocean floor** and can **only** be found in what type of water?

- A** saltwater
- B** freshwater
- C** puddles
- D** boiling

(a)

**Arthropods** are the largest animal phylum. What are **two characteristics** of arthropods?

- A** have three main body parts and no legs
- B** have segmented bodies and jointed legs
- C** only have four legs and two sets of wings
- D** have two main body parts and wings

(b)

Spiders are **insects**.  
**True or false?**

- A** true
- B** false

(b)

**Arachnids** include scorpions and \_\_\_\_\_. They have an **exoskeleton** and **four pairs** of jointed legs.

- A** insects
- B** spiders
- C** reptiles
- D** mammals

(b)
