

Name _____ Class _____ Date _____

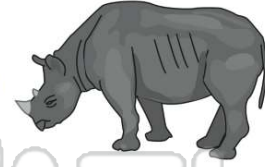

1 A mouse's **ability to hide** helps it **survive** because it enables it to _____.

- A find food
- B capture prey
- C use up energy
- D escape predators

2 A rhinoceros's horns are an **adaptation**. **How would a rhinoceros use its horns?**

- A for running
- B for eating
- C for protecting itself
- D for mating

3 I have a **backbone**. I am bigger than most invertebrates. I also move faster than most invertebrates. **What am I?**

- A a spider
- B a vertebrate
- C a mollusk
- D _____

4 I **do not have a backbone**. I am smaller than most vertebrates. I move slower than most vertebrates. **What am I?**

- A an invertebrate
- B a reptile
- C a bird
- D _____

- B A picture is worth a thousand words.
- C A leopard cannot change its spots.
- D There is safety in numbers.

10

What **behavioral adaptation** tactic do **opossums** use when predators are around?

- A They play dead.
- B They run.
- C They hide in a shell.
- D They burrow underground.

ANSWER KEY

A mouse's **ability to hide** helps it **survive** because it enables it to _____.

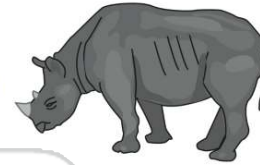

- A find food
- B capture prey
- C use up energy
- D escape predators

(d)

A rhinoceros's horns are an **adaptation**. How would a rhinoceros **use its horns**?

- A for running
- B for eating
- C for protecting itself
- D for mating

(c)

I have a **backbone**. I am bigger than most invertebrates. I also move faster than most invertebrates. **What am I?**

- A a spider
- B a vertebrate
- C a mollusk
- D an echinoderm

(b)

I **do not have a backbone**. I am smaller than most vertebrates. I move slower than most vertebrates. **What am I?**

- A an invertebrate
- B a reptile
- C a bird
- D a fish
