

Name _____ Class _____ Date _____

1 What is a **major source of energy** for cellular respiration?

- A DNA
- B water
- C the cell membrane
- D glucose

3 What are all the **products** of cellular respiration?

- A carbon dioxide
- B carbon dioxide and water
- C carbon dioxide, water, and energy

2 What substance is needed to carry out **respiration**?

- A oxygen
- B carbon dioxide
- C nitrogen
- D carbon

4 **Plants** do not use the process of cellular respiration.

- A true
- B false

PREVIEW

- B ribosomes
- C nucleus
- D cytoplasm

- B has a large amount of carbon dioxide
- C has a small amount or no oxygen
- D has a small amount or no carbon dioxide

9 **Alcoholic fermentation** is important to bread rising.

- A true
- B false

10 _____ builds up when you run as fast as you can for as long as you can because your **cells cannot get enough oxygen**.

- A Nucleic acid
- B Battery acid
- C Lactic acid
- D Hydrochloric acid

ANSWER KEY

What is a **major source of energy** for cellular respiration?

- A DNA
- B water
- C the cell membrane
- D glucose

(d)

What substance is needed to carry out **respiration**?

- A oxygen
- B carbon dioxide
- C nitrogen
- D carbon

(a)

What are all the **products** of cellular respiration?

- A carbon dioxide
- B carbon dioxide and water
- C carbon dioxide, water, and energy
- D carbon dioxide, water, energy, and

(c)

Plants do **not** use the process of cellular respiration.

- A true
- B false

(b)

- C nucleus
- D cytoplasm

- C has a small amount of no oxygen
- D has a small amount of no carbon dioxide

Alcoholic fermentation is important to bread rising.

- A true
- B false

(a)

_____ builds up when you run as fast as you can for as long as you can because your **cells cannot get enough oxygen**.

- A Nucleic acid
- B Battery acid
- C Lactic acid
- D Hydrochloric acid

(c)
