

Name _____ Class _____ Date _____

1 Which of the following is **not** a cause of the **death** of many of the world's **coral reef** systems?

- A increased pH level
- B decreased pH level
- C acid rain
- D fishing techniques

2 **Energy conservation** and _____ are two ways to help **prevent global warming** and climate change.

- A energy efficiency
- B deforestation
- C burning of fossil fuels
- D glacial erosion

3 **Thousands of species** become **extinct** every year.

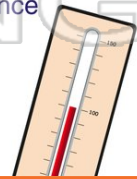

True or false?

- A true
- B false

4 The **average temperature** on Earth has **increased** every year since _____.

- A 1960
- B 1975
- C 1980

7

- A true
- B false

- A animals
- B the greenhouse effect
- C fossil fuels
- D industrialization

9

The **United States** makes up roughly **5% of the world population**, but is responsible for contributing **over 20% of the world's carbon dioxide** emissions.

True or false?

- A true
- B false

10 One **detrimental** effect to **freshwater** supply is _____.

- A the extinction of certain insects
- B animal population
- C coral reefs
- D overpopulation

ANSWER KEY

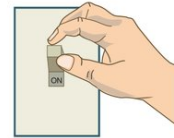

Which of the following is **not** a cause of the **death** of many of the world's **coral reef** systems?

- A increased pH level
- B decreased pH level
- C acid rain
- D fishing techniques

(a)

Energy conservation and _____ are two ways to help **prevent global warming** and climate change.

- A energy efficiency
- B deforestation
- C burning of fossil fuels
- D glacial erosion

(a)

Thousands of species become **extinct** every year.

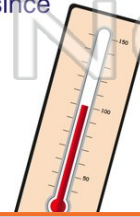

True or false?

- A true
- B false

(a)

The **average temperature** on Earth has **increased** every year since _____.

- A 1960
- B 1975
- C 1980
- D 2001

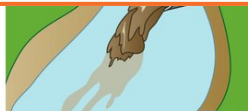

(c)
