## Count the Jellybeans

Bertie loves eating fruit and today he wants to eat the heaviest fruit in his lunchbox.

You will need:
jellybeans, apples, bananas, peaches and plums.
Here's what to do:
Place an apple in one side of the scales. Make a guess about how many jellybeans will balance the apple.
Add jellybeans to the other side until the scales are balanced.
Write down the number of jellybeans you used.

|  | My guess | Total |
| :---: | :--- | :--- |
| Apple |  |  |
| Banana |  |  |
| Peach |  |  |
| Plum |  |  |

## Bertie's Super Challenge:

Find a person you can balance with on a seesaw!
