How

- When counting money, it is best to start with the highest value coin or paper bill you have, then count on.  
For example:  
If you have the following coins, it is best to start by counting the quarter first. Then count on.

25¢   35¢   45¢   50¢   55¢   60¢   61¢   62¢   63¢   64¢

The total amount of these coins is 64¢ or \$0.64.

- Now it is time to try another example. This time start with a one dollar bill!

\$1.00

\$1.10 \$1.20 \$1.25 \$1.26

The total amount of money here is \$1.26.

## Try This!

- Count the following sets of money and write the amount on the line.
