- ✓ Amphibians live part of life in water and part on land.
- ✓ When they live in water, they breathe through gills.
- ✓ When they live on land, they breathe through their lungs.

***Let's check what we have learned so far:  
Name one detail about a reptile.***

## How are animals different from each other?

Animals are similar in many ways, but they are also different too!

Here are some ways that animals can be different:

### Where Animals LIVE:

- ✓ Some animals live on land (like a tiger), some animals live in the water (like a fish), and some animals live on land and in water (like a frog).
- ✓ Some animals live in places where it is very hot (like a camel), some animals live where it is very cold (like a polar bear), and some animals live in places where it is warm (like a squirrel).

***Let's check what we have learned so far:  
Name one way animals can be different.***

## What Do Animals Need to Live?

- ✓ Animals need **water** to live.
- ✓ Animals need **food** to live:
  - \* Some animals eat just plants (they are called herbivores).
  - \* Some animals just eat other animals (they are called carnivores).
  - \* Some animals eat plants AND other animals (they are called omnivores).

An illustration showing a row of diverse children standing on a green patch of grass. Above each child is a thought bubble containing various educational icons: a cube, a microscope, a protractor, a globe, a chemistry flask, a globe, a DNA helix, a pie chart, a bar graph, a calculator, and a plus-minus sign. One bubble also contains the letters "ABC".
