6. _____ - an organism that has two of the same alleles for a particular trait

7. _____ - a picture of the actual chromosomes of the organism, arranged in pairs

8. _____ - cellular process responsible for producing sex cells (egg and sperm) that contain half the number of chromosomes of the parent cell

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Genotype

Heredity

Homologous chromosomes

Meiosis

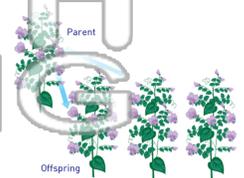

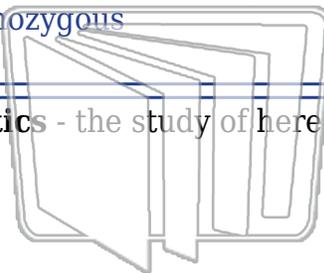

Homozygous

Genetics

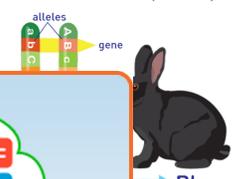

Heterozygous

Karyotype

1. **genetics** - the study of heredity

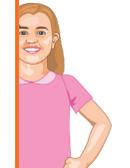

2. **genotype** - the genetic makeup of a particular organism

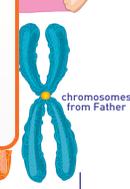

3. **heredity** - the passing of traits from parents to offspring

4. **heterozygous** - having two different alleles for a trait

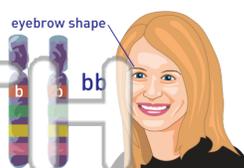

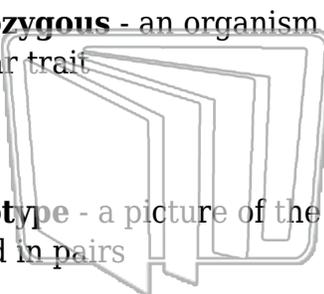

5. **homologous chromosomes** - chromosomes that are similar in shape and size, one from each parent
