

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Scientific name

Protozoa

Protista

Vertebrates

Plant life cycle

Phloem

Xylem

Taxonomy

1. _____ - vascular tissue that transports organic nutrients to all parts of the plant

2. _____ - how long a plant takes to grow, flower, and make seeds

3. _____ organism their own example

PREVIEW

4. _____ move

5. _____ relations

6. _____ - animals that have a backbone; five main groups of vertebrates: fish, birds, reptiles, amphibians and mammals

7. _____ - vascular tissue that moves water and minerals from the roots to the rest of the plant

8. _____ - a two-part name that is made up of an organism's genus and species

Name _____ Class _____ Date _____

Match each of the following terms to its definition:

Scientific name

Protozoa

Protista

Vertebrates

Plant life cycle

Phloem

Xylem

Taxonomy

1. **phloem** - vascular tissue that transports organic nutrients to all parts of the plant

2. **plant life cycle** - how long a plant takes to grow, flower, and make seeds

3. **protists** that are unicellular organisms, some of which are food for other organisms, such as amoebas

4. **protozoa** - single-celled organisms that can move on their own

5. **taxonomy** - the study of the relationships between different groups of organisms
