

Introduction to Functions

Math

Name _____ Class _____ Date _____

1 A **function** is a **rule** in which a number, called the **input**, has mathematical operations performed to it to determine the **answer** of another number, called the

6 The table shown represents which **function**? Check it.

Input, x	2	3	4	5
Output, y	-3	-1	1	3

2 The **function** $y = x + 2$ when evaluated for the **input** of 6, gives an **output** of

$$y = x + 2$$

$y = 2x - 5$

$y = 2x - 7$

$y = 2x - 1$

3 V _____ b _____

4 V _____ f _____ a _____ has a _____ at the _____

5 This graph represents wages per hour. What are the **output values** for working 3, 4, and 5 hours?

9 Write the equation of a line with a **slope** of -3 and a **y-intercept** of 9.

10 The equation of a line is $y = -8x - 5$. What is the **slope** of the line?

Introduction to Functions - Answer Key

Math

Name _____ Class _____ Date _____

1 A **function** is a **rule** in which a number, called the **input**, has mathematical operations performed to it to determine the **answer** of another number, called the **output**.

2 The **function** $y = x + 2$ when evaluated for the **input** of 6, gives an **output** of 8.
 $y = x + 2$

3 Write the equation of the function that...

6 The table shown represents which **function**? Check it.

Input, x	2	3	4	5
Output, y	-3	-1	1	3

$y = 2x - 5$

$y = 2x - 7$

$y = 2x - 1$

4 Write the equation of the function that...

5 This graph represents wages per hour. What are the **output values** for working 3, 4, and 5 hours?

\$30, \$40, \$50

9 Write the equation of a line with a **slope** of -3 and a **y-intercept** of 9.

$y = -3x + 9$

10 The equation of a line is $y = -8x - 5$. What is the **slope** of the line?

$y = mx + b$ where m is the slope. The slope is -8.
