

Name _____ Class _____ Date _____

1 A _____ is an **opening in the earth's crust** from which hot, melted rock forcefully flows when pressure builds inside the earth.

- A volcano
- B magma
- C lava pit
- D mountain

2 What is **magma**?

- A a hot rock
- B melted rock above the earth's surface
- C melted rock beneath the earth's surface
- D rock that has cooled above the earth's surface

3 **Lava** is **melted rock** that flows _____ the earth's surface.

4 **Volcanoes** happen when _____ builds up beneath the earth's surface and pressure forces the magma out

7 _____ rocks breaking into smaller pieces over time?

- A earthquake
- B volcano
- C weathering
- D faulting

8 _____ can also cause rocks to weather and to break up into smaller pieces.

- A Grass
- B Cold weather
- C Water
- D Dirt

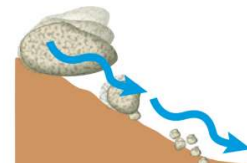

9 What do we call the **process** in which land that has been **weathered, moved and shifts** over time?

- A earthquake
- B weathering
- C water flow
- D erosion

10 _____ is **caused** by water, wind, gravity, and glaciers.

- A A waterfall
- B A glacier
- C Erosion
- D A lake
