

Name _____ Class _____ Date _____

1 **Gases** are all around us. There is a layer of gas that surrounds earth, which is called _____

- A space
- B the atmosphere
- C oxygen
- D mantle

2 _____ is a **gas** that we need to **breathe** in order to survive.

- A Oxygen
- B Water
- C Iron
- D Helium

3 Some properties of matter can be measured using tools, such as a balance to measure an object's **mass** and a _____ to measure the **volume**.

4 Scientists most often use _____ measurements when **measuring matter**.

PREVIEW

7 _____ used for measuring the **volume** of liquid?

- A meter (m)
- B kilometer (km)
- C liter (L)
- D gram (g)

8 _____ that tells how much matter fits into a certain space.

- A Buoyancy
- B Mass
- C Density
- D Volume

9 **Buoyancy** is a property of matter. What is **buoyancy**?

- A how tall an object is
- B how much an object weighs
- C whether an object sinks or floats
- D what an object is made of

10 **Size** is a property of matter. The size of an object can be **measured** using the _____ millimeters (mm), centimeters (cm), and meters (m).

- A metric units
- B English units
- C American units
- D nonstandard units
