

Name _____ Class _____ Date _____

1 What organisms are the **most abundant** on earth?

- A humans
- B insects
- C bacteria
- D mammals

2 Who discovered the **first bacterial cell** in the late 1600's?

- A Albert Einstein
- B Robert Hooke
- C Richard Borsvert
- D Anton van Leeuwenhoek

3 Bacteria do not have a **nucleus**. What does this **classify** them as?

4 Which is a **shape** of a bacterial cell?

- A square

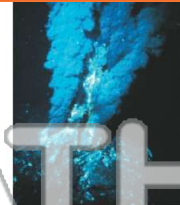

PREVIEW

7 **A** keeps a bacterium warm
B defends a bacterial cell
C helps a bacterial cell move
D gives a bacterial cell a cool hairstyle

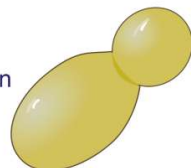

- A Eubacteria
- B Archaeobacteria
- C Protists
- D Fungi

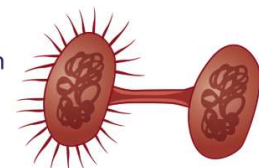

9 What **process** do bacterial cells use to reproduce **asexually**?

- A conjugation
- B binary fission
- C sexual reproduction
- D respiration

10 What **process** do bacterial cells use to reproduce **sexually**?

- A conjugation
- B binary fission
- C asexual reproduction
- D respiration
