

Name \_\_\_\_\_ Class \_\_\_\_\_ Date \_\_\_\_\_

1 \_\_\_\_\_ is the process of water reaching a certain temperature and changing from gas to liquid form.

- A Evaporation
- B Precipitation
- C Reduction
- D Condensation

2 A waste that is created by animals is \_\_\_\_\_, while plants create \_\_\_\_\_.

- A oxygen, carbon dioxide
- B carbon dioxide, oxygen
- C energy, soil
- D soil, energy

3 The earth's atmosphere is made up of \_\_\_\_\_ nitrogen gas.

4 What is nitrogen fixation?

A when nitrogen is in its gas form

## PREVIEW

7 \_\_\_\_\_ the day is \_\_\_\_\_ and the temperature at night is \_\_\_\_\_.

- A in the middle and is made up of vines and smaller trees
- B at ground level where life is most abundant
- C within the soil of the rain forests floor
- D at the top and is made up of tall trees

- A warm, warm
- B cold, hot
- C hot, cold
- D hot, warm

9 The grassland biome is an ecosystem that receives between 0 and 25 centimeters of rain per year.

- A true
- B false

10 A savanna is \_\_\_\_\_.

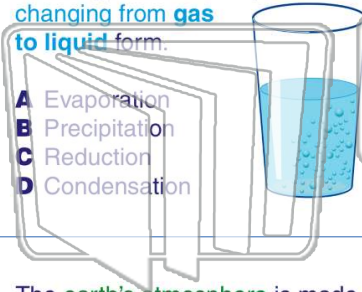

- A a grassland located near the earth's poles
- B a desert located in between the poles and the equator
- C a grassland located near the equator
- D a grassland that receives over 500 centimeters of water per year
