7 adapted to their environment allowing a better chance of survival than other individuals within the same species.

- A true
- B false

8 **Individuals of the same species** have different **adaptations** to their environment.

- A Variation
- B Overproduction
- C Adaptation
- D Evolution

9 Organisms of the same species all seek the same **limited resources**. This term for this is _____.

- A adaptation
- B evolution
- C competition
- D defeat

10 Can two species **coexist** in the same environment if they have the same food source?

- A yes
- B no
